

PANIC IN SAN FRANCISCAT !

San Franciscat has been seized by fear. Food factories are the target of repeated robberies. But don't worry; Supercat is determined to bring the thieves to justice.

If you are Kitthief, you have to steal 5 foods of the same type to win. If you are Supercat, you must stop Kitthief by knocking him out.

☀️ SETTING UP 🌟

A player chooses to play Supercat. He takes: the *Supercat* card and places it in front of him, the *hit* token.

The other player chooses one kitthief. He takes the corresponding *kitthief* card, the *food* card, the *choice* token, the corresponding *food* tokens.

☀️ GAME TURN 🌟

The kitthief secretly chooses a food on the *food* card by placing his token on it. Supercat has to guess which food is selected.

If Supercat makes a mistake, the kitthief will raise the token corresponding to the food on the card.

If Supercat finds it, he will roll the dice. If the dice number is on the *kitthief* card, he will place or move forward the *hit* token on it. If not, the kitthief will have nothing.

Superpowers

When Supercat misses his roll, he gets angry. The player turns his Supercat card a quarter clockwise. When he has done this 3 times and he misses again, he flips his card and reveals 3 superpowers.

Supercat can use one of them whenever he wants. Once the superpower has been used, the player flips his card again and puts it back to its original position.

Super strength: if Supercat rolls the dice successfully, he will hit twice.

Super speed: Supercat can roll the dice twice in a row.

Telepathy: Supercat adds an extra dice face for one roll that can hit the kitthief.

Sneak peak

Hugo plays Supercat. Julie has chosen Ninchat.

Julie chooses «fish» with her choice token on the food card. She asks Hugo «fish or chicken? ». Hugo answers «chicken». Julie shows her choice. Hugo got it wrong, she raises her fish token (blue) one time on her card.

Julie chooses again. She still puts her token on "fish" and asks the question again. This time Hugo answers "fish". Julie shows her choice and as Hugo is right, he takes the dice. To be able to hit Julie, he has to roll 2 or 4. He rolls a 4 and puts the token on the first space on Julie's card.

In the next round, Hugo finds Julie's food again. He rolls the dice but rolls a 3. Hugo misses; he turns his Supercat card a quarter. Later in the game, Hugo fails to make a move for the 4th time. He then turns over his Supercat card. From this point on, when he wants to, he can use one of the superpowers...

Hugo used the super speed of Supercat. He then flips his Supercat card over and returns it to its starting position.

Finally, after 5 minutes, Hugo ended up giving Julie a third shot, the Ninchat is knocked out. Hugo wins the game. San Franciscat can rest peacefully.

★ KITTHIEVES ★

They scavenge San Franciscat for food to steal. They are Supercat's worst enemies. They are the kitthieves. Each one of them has favorite foods and weaknesses.

Ninchat: he discovered a taste for flying very early. Native of Japantown in San Franciscat, he is a great lover of chicken and fish.

Al Chapone: he's the godfather in the local Mafia. Several times locked up in Al Chatraz by Supercat, he always got out. He is interested in all kinds of food.

Kitwoman: she grew up in uptown Presidio. She is a great food lover, but she is pork intolerant.

Charsène Lapin: he arrived a few years ago in San Franciscat. Since then, he has been scouring the Union Square district. Charsène has a special capacity. If he succeeds in his robbery, he will roll the dice. If the result is even, he will steal an extra food.

★ KITTY BOY & KITTY GIRL ★

You can decide to add one of the two Supercat sidekicks to your game. They offer an extra option to Supercat when he is able to use his superpowers.

Kitty Boy: Supercat sends Kitty Boy to secure a food factory.

Supercat names a food and rolls the dice. The kitthief must place the grey token on the food and leave it on for the number of turns determined by the dice. He will not be able to choose it during this time.

Caution! you cannot play Kitty Boy against Ninchat.

Kitty Girl: Supercat sends Kitty Girl on a sneaky mission.

Supercat rolls the dice. If the result is odd, he can lower a food from the kitthief down by one square. If the result is even, he can lower one or more foodstuffs by two squares.

★ END OF THE GAME ★

If the kitthief gets 5 foods of the same kind, he wins the game.

If Supercat knocks out the kitthief with the required number of hits, he wins the game.

If chat pardeurs exists, it's because of you.
